

Please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 1-11.

Please cancel claims 12-17

Please add claims 18-26.

- Sub B*
- 11212*
- Cancel*
- Capacity* *W3y*
1. (amended) A packaging film comprising:
at least two layers that each include polyvinyl chloride and at least one other constituent
included in sufficient amount so that the layers have desired properties. *(11212)*
 2. (amended) The film of claim 1, wherein the constituent is a surface active agent.
 3. (amended) The film of claim 2, wherein the surface active agent is included in an
amount that promotes ambient or latent moisture to uniformly spread on the surface of the film.
 4. (amended) The film of claim 2, wherein the amount of surface active agent
ranges from between about 0.001 and 5 parts/hundred resin.
 5. (amended) The film of claim 2, wherein the surface active agent includes one or
more of surfactant, antistat, antiblock, and slip agents.
 6. (amended) The film of claim 5, wherein the constituent is a plasticizer.

Amended

7. (amended) The film of claim 6, wherein the plasticizer is selected from the group consisting of di(2-ethyl-hexyl) adipate and epoxidized soya bean oil.

Amended

8. (amended) The polymer composite film of claim 6, wherein the amount of plasticizer ranges from between about 5 and 60 parts/hundred resin.

Amended

9. (amended) The film of claim 1, wherein at least one of the layers further comprises a process aid.

Amended

10. (amended) The film of claim 1, wherein the constituent is a copolymer.

Amended

11. (amended) The film of claim 10, in which the copolymer is selected from the group consisting of PVCPVA and polyester adipate.

New

18. (new) A packaging film comprising:

Amended

at least two layers that each include polyvinyl chloride and at least one other constituent included in sufficient amount so that the layers have desired properties,
wherein the at least two layers are sufficiently distinct from each other to have different gas permeabilities.

New

19. (new) The film of claim 18, wherein the constituent is a surface active agent.

Salt Lake City

20. (new) The film of claim 18, wherein the constituent is a plasticizer.

Salt Lake City

21. (new) The film of claim 18, wherein the constituent is a copolymer.

Salt Lake City

22. (new) A packaging film comprising:

at least two layers that each include polyvinyl chloride and at least one other constituent included in sufficient amount so that the layers have desired properties,
wherein the at least two layers are sufficiently distinct from each other to have different melting points.

23. (new) The film of claim 22, wherein the constituent is a surface active agent.

24. (new) The film of claim 22, wherein the constituent is a plasticizer.

25. (new) The film of claim 22, wherein the constituent is a copolymer.

26. (new) The film of claim 22, wherein the at least two layers include the inner layer of the film and the outer layer of the film, and wherein the inner layer has a lower melting point than the outer layer.
